SUMMARY

Software Engineer with an Electronics Engineering background, experienced in designing, building, deploying, and maintaining web applications from idea to production. Passionate about software architecture, Progressive Web Applications, distributed systems, cloud technologies, authentication, cryptography, and AI-assisted engineering workflows. Enjoys turning ideas into products while continuously learning through hands-on development.

EXPERIENCE

Independent Software Engineer — Self-employed

Jun 2023 – Present · Remote · Self-employed

- Designed, developed, deployed, and maintained multiple production-ready web applications from concept to deployment using modern web technologies.
- Built Progressive Web Applications (PWAs) with a focus on mobile-first experiences, local-first principles, and maintainable software architecture.
- Designed cloud-native solutions using Cloudflare Workers, Cloudflare KV, REST APIs, and edge infrastructure.
- Developed software products exploring authentication, cryptography, passkeys, blockchain technologies, AI-assisted workflows, and distributed systems.
- Independently managed the complete application lifecycle, including architecture, implementation, domain management, DNS configuration, deployment, monitoring, and ongoing maintenance.

Software Engineering Intern — TSO Mobile Colombia

Oct 2022 – May 2023 · Medellín, Colombia · Internship

- Collaborated with the engineering team to modernize frontend development workflows and reusable component architecture.

PROJECTS

Anthology

Local-first knowledge management platform

A Progressive Web Application for capturing, organizing, and sharing personal knowledge. Built around local-first principles, with optional blockchain publication and QR-based sharing, allowing users to retain ownership of their data while selectively making content public.

- Designed around local-first principles to keep user data available without requiring a centralized backend.
- Integrated optional blockchain publication and QR-based sharing while preserving user control over personal knowledge.

Technologies: React, TypeScript, Progressive Web App, Cloudflare Workers, Blockchain
Live

TD Status

Cloud licensing and telemetry platform for TouchDesigner

Cloud platform for managing software licenses and monitoring TouchDesigner deployments. Provides customer management, heartbeat telemetry, license validation, and operational visibility through Cloudflare Workers and KV.

- Built a cloud-based licensing system supporting customer grouping, license management, and device validation.

Technologies: React, TypeScript, Cloudflare Workers, Cloudflare KV, REST API
Live

Prompter

AI image generation with crypto micropayments

AI image generation platform that transforms user images using curated prompts while accepting USDC payments through the x402 protocol. Designed without user accounts or traditional payment processing, prioritizing simplicity and privacy.

- Integrated x402 to enable USDC micropayments without traditional payment gateways or user accounts.
- Protected proprietary prompts by keeping prompt engineering server-side using Cloudflare Workers and KV.

Technologies: React, TypeScript, Cloudflare Workers, Cloudflare KV, Generative AI, x402
Live · Source

SKILLS

Programming Languages: TypeScript, JavaScript, Python

Cloud & Backend: Cloudflare Workers, Cloudflare KV, REST APIs, Edge Computing, Node.js

Software Engineering: Software Architecture, Distributed Systems, Authentication, Cryptography, API Design

AI & Emerging Technologies: AI-assisted Development, Prompt Engineering, Generative AI APIs, Blockchain, Passkeys (WebAuthn)

EDUCATION

Bachelor's Degree Electronics Engineering — Universidad de Antioquia

Aug 2014 – Jun 2023 · Medellín, Colombia

- Developed a strong foundation in software engineering, embedded systems, electronics, mathematics, and computer architecture.
- Completed an engineering internship focused on modern web development, TypeScript migration, and reusable component libraries.
- Transitioned academic interests toward software engineering through independent product development and modern web technologies.
